CS CO-OP STUDENT

EXPERIENCE

Co-op Analyst | Ministry of Energy (ON)

Toronto, Ontario

May - Aug 2019

- Launched a live portal that displayed hourly energy information using Chart.js, Mapbox, and Bootstrap
- Developed Python scripts which scraped data from XML and HTML repositories to store into our server
- Maintained the portals Django backend, comprised of IIS and MSSQL
- Implemented goals months ahead of schedule

PROJECTS

Tangible Narratives | Embodied Digital Media (RTA 995)

Ryerson University

Jan - Apr 2019

- Explored connections between virtual reality and tangible interaction to expand how virtual stories are created
- Responsibilities included Unity development, HTC Vive integration, maintaining lab equipment, and assisting researchers in implementing and iterating upon prototypes
- Obtained an understanding of the research process and team-oriented product development

Password Generator | Flutter Development

Personal Project

Aug 2018

- Created an android application capable of generating passwords of 6 to 64 characters with alphanumeric and symbol customization
- Developed using the Flutter framework and Dart language, served as an introduction to android development as well as well as the Android Studio IDE
